CAREER SUMMARY

Software Engineer with experience building scalable Front End and Back End applications using Golang, React, TypeScript, and Python. Strong foundation in Software Engineering principles, Agile development, API design, modular architecture, cross-browser compatibility, responsive web development, and component-based systems. Proven ability to drive technical decisions, solve complex problems, and collaborate effectively with cross-functional teams.

TECHNICAL SKILLS

Programming Languages: Golang, TypeScript, JavaScript, Python, C/C++, SQL

Frontend: React, Angular, HTML5, CSS3, Responsive Design, Cross Browser Compatibility, Component-Based Architecture, Accessibility

Backend: Golang, Django, REST APIs, Microservices, Modular Architecture, MySQL, Oracle SQL

Software Engineering: SDLC, System Design, Design Patterns, Code Reviews, Debugging, Performance Optimization, API Development, Agile Methodologies

Methodologies: Agile, Scrum, Test-Driven Development (TDD), CI/CD, Version Control

Professional Skills: Decision Making, Problem Solving, Communication, Team Collaboration, Technical Documentation

Tools: Git, Docker, Jenkins, Bitbucket, Postman, Nginx, Tomcat, Cursor, Claude Code

PROFESSIONAL EXPERIENCE

Vimo India Private Limited | *Software Engineer*

January 2026 – Present

- Promoted to Software Engineer for strong ownership and delivery across Front End modernization, accessibility, and platform improvement initiatives.
- Led UI permission refactor across multiple modules, improving functionality, maintainability, and modular design across enterprise applications.
- Drove JSP to React migration by developing reusable components and scalable Front End architecture.
- Implemented responsive interfaces and improved cross-browser compatibility across modern web browsers.
- Collaborated with Back End engineers and QA teams to deliver reliable end-to-end functionality with minimal production issues.

Vimo India Private Limited | *Associate Software Engineer*

July 2025 – December 2025

- Led accessibility improvements using Axe, WAVE, and screen readers, improving core module compliance from 75% to 95% against WCAG 2.2 AA standards.
- Migrated core Front End modules from JavaScript to TypeScript, improving maintainability, scalability, and component reusability.
- Designed and developed a modular content-editing microservice that decoupled static UI text from the monolithic frontend.
- Improved responsiveness and reduced frontend page load times by 30%.

Vimo India Private Limited | *Software Development Engineer Intern*

January 2025 – June 2025

- Built responsive customer success platform features using React and Go, focusing on functionality, scalability, and maintainability.
- Developed reusable dashboard components using react-grid-layout to improve user experience and code reusability.
- Designed and implemented Back End APIs using modular architecture principles for layout persistence and user configuration.
- Ensured responsive behavior and cross-browser compatibility across supported browsers.

Arvat AI | *Software Development Engineer Intern*

July 2024 – December 2024

- Built features for a customer success platform using React and Go, focusing on performance, scalability, and maintainable delivery.
- Developed a customizable drag-and-drop dashboard using react-grid-layout and built APIs for layout persistence and user configuration.
- Implemented a custom background task queue using goroutines with delayed message processing, eliminating reliance on AWS SQS for scheduled workflows.
- Integrated Slack notifications through API tokens to deliver real-time alerts for proactive incident tracking and resolution.

CORE COMPETENCIES

Front End Development • Angular • React • Component Development • Responsive Design • Cross Browser Compatibility • Back End Development • REST APIs • Modular Architecture • Functionality Enhancement • English Communication

PROJECTS

GreenLight | *Django, JavaScript, YOLOv3, OpenCV*

Oct 2022 – Nov 2022

- Built a CCTV-based monitoring portal using YOLOv3 and OpenCV to detect empty rooms with lights left on and identify electricity wastage.

Tagit | *Django, HTML/CSS, JavaScript*

Jan 2023 – May 2023

- Developed a QR-code based luggage tracking portal with workflows for QR generation, luggage record management, and item identification.

EDUCATION

Thapar Institute of Engineering and Technology

Patiala, India

Bachelor of Engineering in Computer Science and Business Systems, CGPA: 8.69

October 2021 – June 2025
